

PUBLIC-SECTOR DIGITAL SYSTEMS

Make public information easier to find.

Make agency work easier to maintain.

Focused websites, content systems, forms, and workflows around one real bottleneck.

FOCUS Findability / Workflow / Handoff

A strong first step

- **Public content is hard to use**
A website, CMS, document library, or form is difficult to navigate or maintain.
- **Manual staff work has outgrown a workaround**
A team needs a better intake path, status view, or reporting workflow.
- **A bounded phase before a major replacement**
A focused phase can fix one real bottleneck before a major replacement.

What YRC delivers

- **Public information systems**
Websites, content systems, document libraries, public portals, and forms.
- **Operational workflows**
Intake, tracking, dashboards, reporting, and practical integrations.
- **Discovery, QA, and handoff**
UX and content QA, roadmaps, documentation, and staff handoff.

Relevant codes

NAICS

- 541511 Custom Computer Programming

California UNSPSC

- 81112103 Website Design
- 81111503 Systems Integration Design
- 81111504 Application Programming

Commercial work samples

- **CXO Strategies**
Website strategy, design, and maintainable delivery.
- **Storm Ops Flow**
Field workflow for inspections, records, and status visibility.
- **Health for California**
Landing pages, SMS workflow, reporting, and staff support.

Start with a brief fit conversation.

Tell us what residents or staff are struggling to do. We can define the smallest useful first phase.

Commercial work samples only. They are not government past performance.
